Attn: Dave Bibler

I have some concerns on one site just east of New Ulm, possible mound site east of [REDACTED]

REDACTED  
TEXT  
CG.

This small tracked road of where an archeological pre-contact is my concern is the possibility on a burial mound. If this mound is not mapped, it is not protected.

Although half is on private land and half is on DME also private land, but the land is being cultivated. So, I feel further investigation is needed.

If this is not done and if remains are accidentally unearthed, a possibility of a clash between cultures will ultimately follow. As a monitor, it is my job to bring these concerns to light to avoid problems in the future.

Note: 307.8 may apply or 138.
